Ethical Review Statement

The NeoGiANT project seeks to conduct scientific research on the potential of grape marc extracts to reduce the use of antimicrobials in livestock and aquaculture production systems. In doing so, it is recognised that this will require the use of animals for certain investigations.

Animal Welfare

High Standards of Care

1

Upholding the highest levels of welfare, husbandry, and ethics for all species of animals used.

2

Compliance with European and UK law.

Ethical Advisory Board

Oversight and Compliance

Composed of project partners with experience in ethical review of animal studies.

Ensures adherence to the principles of the 3R's:

Reduction: Minimize the number of animals used.

Refinement: Enhance techniques and procedures to reduce suffering

Replacement: Use alternatives to animal testing wherever possible.

Our Commitment

We are dedicated to maintaining transparent practices through regular ethical reviews and updates, and to providing sustainable solutions by reducing antimicrobial use while promoting animal health.

Horizon 2020
European Union Funding
for Research & Innovation

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 101036768
