

BioBeo develops and deploys an education programme that will enhance understanding and engagement across society regarding circularity and the bioeconomy. The project uses five bioeconomy themes: Interconnectedness, outdoor learning, forestry, life below water, and the food loop.

A sustainable network of interconnected European educators and stakeholders co-creates the education programme and provides the means for better coordination between bio-science and education in schools. BioBeo, therefore, has a particular focus on circular lifestyle, circular behaviours, and a governance framework on societywide engagement in bioeconomy policy
